PROFESSIONAL PROFILE

Software Architect and Senior .NET Engineer with more than 12 years of experience designing, building and evolving software. Combines hands-on architecture, .NET, distributed systems, safe modernization, testing, performance, observability and responsibility through production.

EXPERIENCE

Senior .NET Developer / Software Architect

Domingo Alonso Group · July 2021 - Present

Hands-on senior architecture and engineering spanning discovery and design through review, delivery, observability and production follow-through.

Senior .NET Developer / Full Stack Engineer

Anexia Tecnologías y Consultoría · December 2017 - July 2021

End-to-end responsibility across applications, from requirements and functional/technical analysis through architecture, backend, frontend, mobile, deployment and support.

.NET Developer

Vector ITC Group · May 2017 - December 2017

Process and reporting automation, campaign systems, and classic NLP/ML using lexical methods, Bag of Words, TF-IDF and Naive Bayes.

.NET Developer

Nokia · January 2016 - May 2017

Evolution of CAD tools into a GIS-like platform for telecom network modelling, validation, costing and preliminary designs.

.NET Developer

Alcatel-Lucent Enterprise · September 2014 - January 2016

Automation, an internal platform and CAD integrations with engineering validation rules using .NET, C#, VB and web components.

Web Developer

Freelance · June 2013 - October 2014

Web layout and development for clients, delivering public-facing websites.

Systems Technician Intern

La Salle · October 2013 - February 2014

Systems installation and maintenance, with basic Windows Server work.

Android Developer Intern

Signlab Nuevas Tecnologías · January 2013 - April 2013

Android applications for museum-related experiences and interactive image components.

Android Developer Intern

XUL Comunicación Social · October 2012 - December 2012

Early Android application development and reusable mobile components.

COMPETENCIES

Software Architecture · .NET / C# Backend · Functional / Technical Analysis · Problem Decomposition / Solution Shaping · Legacy Modernization · Testing / Quality Engineering · Technical Leadership · End-to-end Ownership · Distributed Systems · Event-driven Architecture · Performance Engineering · SQL / Data Architecture · Observability / Production Diagnostics · Azure Application Platform / CI-CD · Full Stack / Frontend · Mobile / Multiplatform · Applied AI · Agentic Engineering · Agentic Product Architecture

CONFIRMED ACHIEVEMENTS

Integration suite feedback: The largest integration suite changed from approximately 60 minutes to approximately 2 minutes.
Fewer synchronous calls per event: Summary events removed approximately 1-2 synchronous API calls per relevant event.

EDUCATION

Technical Engineering in Management Information Systems - Escuela Politécnica Superior de Córdoba. Coursework completed except the final project; degree not awarded.

LANGUAGES

Native Spanish.

English: advanced technical reading and comprehension; professional spoken conversation developing.
